Wichtige Hinweise

SEN-GEL für runde Sensoren

Farbe: klar

SensorActivator darf nicht verwendet werden!

SEN-GEL2 für eckige Sensoren

Farbe: milchig

benötigt eine Gießform!

SensorActivator darf nicht verwendet werden !

SEN-GEL Ready

Bereits in Form gegossenes SEN-GEL

Mussten runde Sensoren bisher mit SEN-GEL instand gesetzt werden, können sie hierzu jetzt unsere Fertigpads SEN-GEL Ready nutzen. Das spart Zeit und Geld. Hierdurch ergeben sich gegenüber der bisherigen Reparatur folgende Vorteile:

- nicht klebend
- blasenfreier Einbau des Sensors
- unempfindlich gegen Staub, Fett, Fingerabdrücke etc.
- hochelastisch
- hochtransparent
- Lichtbrechungsindex fast wie Glas
- preiswert - kein Neukauf teurer OE-Sensoren
- einfache und schnelle Handhabung

SensorActivator darf nicht verwendet werden !

SEN-GEL Ready Plus

Bereits in Form gegossenes SEN-GEL plus Spritze

Obwohl eckige Sensoren mittlerweile sowohl mit SEN-GEL2 als auch mit SEN-GEL Ready repariert werden können, blieben Sensoren, die unter dem Silikon eine Wabenstruktur haben, außen vor. Eine Reparatur dieser Sensoren war bisher nicht möglich.

Mit SEN-GEL Ready Plus haben wir nun eine Reparaturlösung: ein Kombipaket aus SEN-GEL und SEN-GEL Ready Plättchen. Nach Entfernen aller Silikon- und PU-Rückstände auf dem Sensor kann dieser zuerst leicht mit SEN-GEL befüllt werden. Nachdem das Gel getrocknet ist (ca. 10 Minuten), kann das fertige SEN-GEL Ready Plättchen einfach auf den Sensor aufgelegt werden.

SensorActivator darf nicht verwendet werden !
